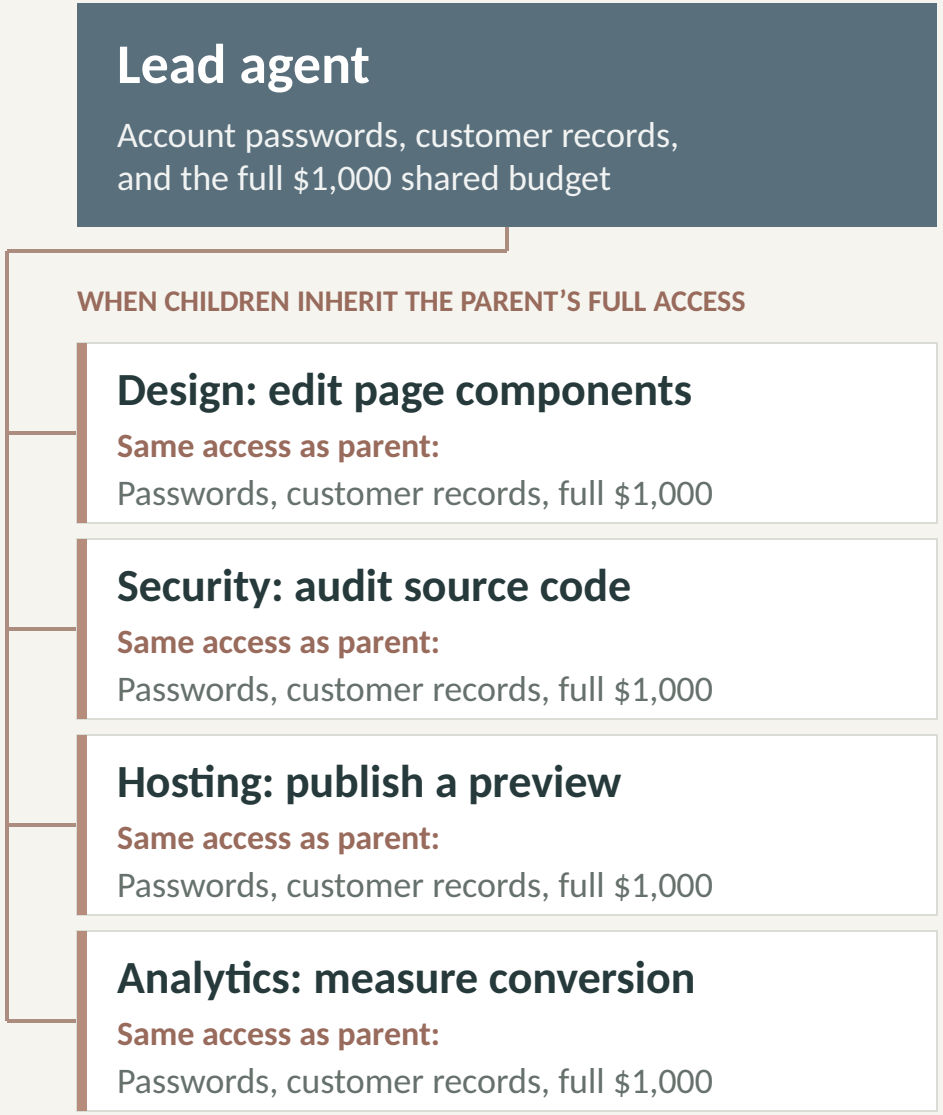
AgentPass

THE PROBLEM

Subagents inherit more of their parent's access than their tasks require

Even an agent editing a page can access passwords, customer records, and the full budget.



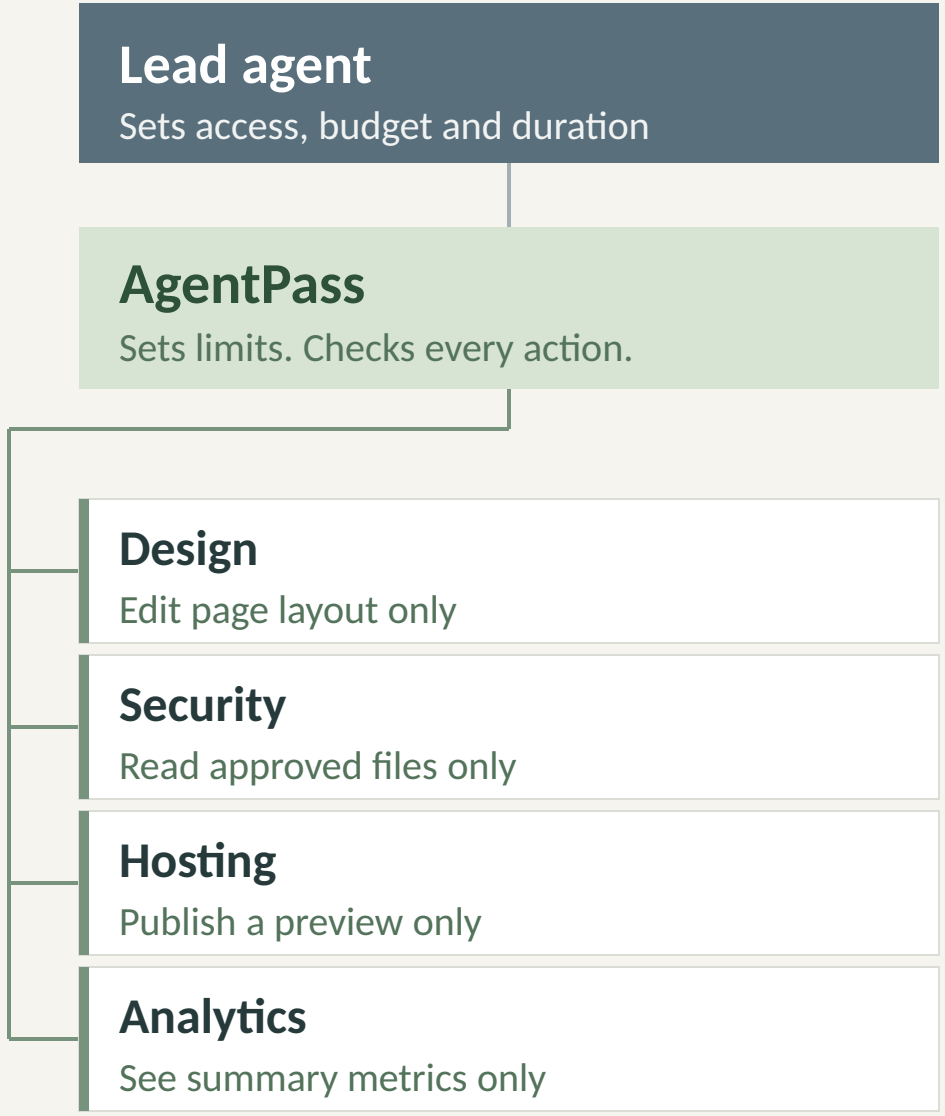
THE SOLUTION

AgentPass gives each agent scoped permissions

Agents can request, negotiate, and use them.
The owner can revoke them.

EXAMPLE SPENDING LIMIT

$1,000
Parent budget

$200
Child spending limit


Child spend also reduces the parent's remaining budget.
